

TRANSPORTATION COSTS

INDICATIVE GUIDE

Last updated: 2026-07-28

The EcoCocon wall system is shipped to all of the EU countries, EEA member and cooperating countries, USA and Canada.

Shipping to continental Europe, mainland UK and Ireland is done via enclosed lorries. Other locations may require shipment in containers and are not covered by this guide.

If the delivery place, be it the construction site or another location, cannot be reached by a lorry from continental Europe, please contact your local partner for a transport price estimate.

A standard lorry can usually carry about 140 m² of EcoCocon panels or 130 m² when accompanied by additional materials such as fibre boards and clay plaster. Larger lorries can take up to 170 m² of EcoCocon panels - prices are available upon request.

While we always strive to ensure the lowest transport prices, please keep in mind they are subject to fluctuation. The final transport quote can only be provided several weeks in advance. The enclosed price ranges are for information purposes only.

Note:

This estimated range reflects transport costs from the nearest to the farthest point from production, but the location of the unloading point also plays a significant role. Prices are not fixed and reflect current market conditions. Estimated price includes loading at the dispatch facility. Unloading at the delivery site is not included. All prices are stated excluding VAT.

Any additional fees such as import/export taxes are excluded from the quoted transportation prices, these should be confirmed with EcoCocon before shipping. If the customer is not VAT registered, VAT will need to be paid at the customs before the delivery can be made.

Country	Approx. price per lorry in € ex. VAT
Albania	2,200 - 3,650
Austria	700 - 1,465
Belgium	1,800 - 2,615
